

## **Purchase & Care Considerations:**

**Finding the right puppy for the right person is our main concern. The puppies welfare is important to us. Please consider these questions before purchasing a puppy from us or from anyone.**

- **is everyone in your family personally committed to having a puppy?**
- **is everyone agreeable as to which breed to get?**
- **have you considered all the financial obligations involved in raising a puppy?**
- **if this is a gift for an older adult, do they really want a puppy? ask them.**
- **is a good knowledgeable vet available to care for your puppy?**
- **is anyone at home during the day to see to the puppies needs?**
- **if not, how long will the puppy be left alone?**
- **what type of housing will the puppy be left in when no one is around?**
- **is your yard properly fenced for the breed you choose? is the yard big enough?**
- **will the puppy be kept safe from predators, including other larger pet?**
- **do you have children & are they instructed about handling small baby animals?**
- **Have you considered what type of house training you are going to use?**
- **if you travel a lot, will this breed of dog be able to go with you in the accommodations you use?**
